

Windows Vista/7/8

Microsoft Security Client Oobe stopped due to the following error: 0xC000000D

Session "Microsoft Security Client Oobe" stopped due to the following error: 0xC000000D

The way I resolved the issue was to delete one file

(You will need to alter folder options to view file)

C:\ProgramData\Microsoft\Microsoft Security Client\Support\EppOobe.etl

Deleted file left in recycle bin and rebooted

Checked event viewer again problem no longer there

Emptied recycle bin again rebooted

No problems on system since
